MXI® ACCESS**ANTIVIRUS**™

Optional Antivirus Scanner Provides Powerful Protection

The ACCESS Antivirus Scanner is optionally available on all MXI encrypted USB drives.

Using powerful McAfee® antivirus and anti-malware security technology, it protects your USB drive and your computer from viruses, worms, trojans and other malware threats.

Most organizations today already actively protect their network from becoming infected by using desktop anti-malware or anti-virus software. However, with access to portable data now an everyday necessity, this form of protection is not enough.

MXI Security's ACCESS Antivirus Scanner™ prevents malware from being copied onto USB drives, allowing users to retain the convenience of portable storage while protecting the devices, their data, and the systems they encounter from malware. Resident on the device and requiring no installation, this security measure is available on each and every computer a users visits.

ACCESS Antivirus Scanner is a perfect compliment with the Stealth Key and Stealth HD malware-proof mode of operation.

"Always-On" Safety and Security

ACCESS Antivirus Scanner notifies the user immediately if they plug their USB device into an infected host computer. The scanner is always on alert, constantly monitoring data transfers to ensure that malware will not be transferred to the device.

Benefits and Features

Host Health Check. Be aware if you are plugging into an infected host. When an MXI Security device with the on-board Malware Scanner is plugged into a host computer, it automatically scans vital areas, ensuring the host is generally secure. If not, a warning appears so that the user can take immediate action and remove device.

Active Scanning. Get protection that's always on. The on-board Malware Scanner constantly monitors file transfers to the device, automatically detecting and eliminating any malware that, under normal circumstances, could be copied to the device and potentially transferred to other systems.

Quick Start Up. As soon as you plug in your secure USB device, Antivirus Scanner is ready to use.

Automatic Malware/Virus definition Updates. The most current AV updates are always pushed out to the device ensuring around the clock protection.

Intrusion Log. View log reports on any malware of viruses detected by the scanner.

Tamper-resistant Architecture. Tamper-proof architecture ensure the ultimate in data security and protection from viruses and malware.

On-Demand Scanning. Scan quickly and easily for any malware or viruses that may be present on the device.
